

MADWOOD

# BENCH WITH BUILT-IN GUN CABINET

By MADwood, in collab with Bingo Rimér and Scandinavian Safe

A bedside bench with a built-in safe provides a convenient and discreet solution for securing your valuables while keeping them close at hand. The bench's structure is made of high-pressure MDF and covered in solid oak planks, and is treated with a hard wax oil from Vesting for added protection. The door to the safe is hidden in the oak ribs for a seamless look.

The bedside bench features a cushion that is covered in high quality fabric for a comfortable place to sit or rest. This makes it an ideal addition to your bedroom or hallway, giving you easy access to your valuables while also providing a functional and stylish piece of furniture. If you add 30kg to the safe, it's legal to place it freely without securing it to the wall or floor.
