

MADWOOD

# TABLE WITH BUILT-IN GUN CABINET

By MADwood, in collab with Bingo Rimér and Scandinavian Safe

A built-in safe within a table or bench offers a subtle way to keep your valuable possessions secure and accessible. The unused space underneath the table was transformed into a sturdy base for the safe. The table's construction is made of high-pressure MDF and wrapped in solid oak planks, with a decoflex oak veneered tabletop and solid oak border, and a 30mm MDF core. It's treated with a hard wax oil from Vesting for enhanced protection. The door to the safe is hidden in the oak ribs, creating a seamless appearance.

The safe can hold three firearms, as well as extra ammunition and accessories, and has soft gun rests to protect against scratches and damage. If you add 30kg to the safe, it's legally allowed to be placed without being secured to the wall or floor.
